MBA - Business Analytics (Xavier Business School)

Indian Cyber Security Solutions:

About the Company:

Indian Cyber Security Solutions is an organization which caters to the need of technology-based risk management & cyber security solution across the globe. ICSS was established in 2013 & by this time it has gathered a good deal of momentum and has reached a distinguished position out of the leading firms in this domain in the country.

Indian Cyber Security Solutions as a unit of GreenFellow IT Security Solutions Pvt Ltd aims to provide cyber security solutions to private and government organizations across the globe. With around 200+ clients across the globe ICSS aims at providing Vulnerability Assessment & Penetration Testing services making cyber security convenient for every organization.

ICSS training & development provides training on Cyber Security (Ethical Hacking), IOT, Cloud Computing (AWS/Azure), Machine Learning, Python Programming, CCNA (networking), Block Chain and on upcoming technologies where cyber security plays a vital role. ICSS R&D division is heavily relied on the training division as young and dynamic students fearlessly innovates and excel which helps ICSS to build a strong technical team ready to accept any challenges.

Brands that trust the company:

- **Banking & Finance Industry:**
 - EVANTAGE Softech India Pvt. Ltd.
 - GTCS
 - thoughtscrest
 - stradegi
 - QDB (Qatar Development Bank)
 - mp-gb
 - HDFC Life
 - FIVE STAR-Business Finance Limited
 - GCC™ Exchange
- **Software & App Development- Android & IOS:**
 - AYS-IT Solutions Pvt. Ltd.
 - ggk tech
 - CodeLogicX
 - interfacing
 - Commlab India
 - MC-SAM
 - CAMBRIDGE Technology
 - EVERGREEN
- **SOC Services:**
 - Crystal Networks
- **Research & Consultant:**
 - iKOnet
 - MSH
- **Share Marketing:**
 - TRADEJINI
- **Healthcare Industry:**
 - Sasta Sundar
 - ALLSPARK Health

Company Products, Services & Courses:

Products:

1. SAVE: Secure AI based Vulnerability Assessment Tool for Enterprises-

SAVE empowers businesses to confidently navigate the complex cyber landscape. By unifying people, processes, and technology, organizations can quickly assess their security posture, identify vulnerabilities, and make informed decisions to mitigate risk.

Product Features & Pricing:

- **Optimized:** Enhanced efficiency and streamlined workflows to maximize performance.
- **Better Security:** Robust protection measures to safeguard your data and prevent breaches.
- **Low Cost:** Cost-effective solutions that deliver value without compromising quality.

Basic Plan	Premium	Enterprise
₹1,603 per month	₹13,416 per month	₹1,01,170 per month

2. **MargDarshak**: MargDarshak is an online phishing website detection tool developed using Machine Learning technology.

It is basically a Phishing Website Detection Tool using Machine Learning.

Indian Cyber Security Solutions had developed this tool and it's completely free to use. Before you fall a pray to a cyber-crime, just verify the URL before you share any kind of personal information or doing any online transactions. MargDarshak sets up the alarm and acts as a first line of defense.

Youtube link for Margdarshak:

https://youtu.be/CFq_AJTbckY?si=kd2eaLsMmMkUlgYM

Services:

Compliances:

- GDPR Managed Services
- PCI DSS Compliance Services
- HIPAA Compliance Services
- ISO/IEC 27001 Lead Auditor Training
- Vulnerability Assessment and Penetration Testing (VAPT)
- Comprehensive VAPT Services for NIST Compliance

Penetration Testing:

- Web Application Penetration Testing
- Network Penetration Testing
- Mobile Penetration Testing
- Cloud Penetration Testing
- Data Recovery
- Social Engineering
- Source Code Review
- Red Team Assessment
- Security Operation Centre

Courses:

1. **Graduation:** B.Sc in Cyber Security (Degree from MAKAUT-ICSS)

Pricing: 1,98,800/- (One time payment) or 2,15,000/- (Semester-wise payment)

2. **Diploma Courses:**

- Diploma in Cyber-Security Training: 12 Months Training
Pricing: 63,000/- + GST (@18%)
- Diploma in Machine Learning: 9 Months Training
Pricing: 41,000/- + GST (@18%)
- Diploma in Network Security Training: 9 Months Training
Pricing: 58,500/- (Classroom with Global) or 37,500/- (Classroom without Global) + GST (@18%)
- Diploma in Web Application Security by ICSS: 15 Months Training
Pricing: 58,500/- (Classroom with Global) or 37,500/- (Classroom without Global) + GST (@18%)
- Diploma in Advanced Cloud & Network Security: 18 Months Training
Pricing: 93,000/- + GST (@18%)
- Diploma in Cloud Infrastructure Management: 12 Months Training
Pricing: 60,500/- + GST (@18%)

3. **Networking:**

- CCNA Certification: 40 Hours Course; Price: 13,000/- + GST
- CCNP Certification: 40 Hours Course; Price: 21,000/- + GST

4. **Cloud Computing:**

- AWS Basic Training: 3 Months Training

Pricing:

Courses	Classroom Training	Online Self-Paced Live Training
Basic Course	12,000/- + GST	12,000/- + GST
Advance Course	14,000/- + GST	15,000/- + GST

- Microsoft Azure Training: 3 Months Training
Pricing: Classroom Training- 12,000/- + GST, Online Training- 12,000/- + GST
- Advance Cloud Computing Course: 3 Months Training (Classroom/Online)
Pricing: 20,000/- + GST

5. Cyber Security:

- Ethical Hacking Training: 40 Hours Course
Pricing: 15,000/- + GST
- Certified Cyber Security Professional Training: 40 Hours Course
Pricing: 23,599/- + GST (Classroom Training), 25,999/- + GST (Online Course)
- Web Penetration Testing Training: 3 Months Training
Pricing: 14,000/- + GST (Classroom), 12,000/- + GST (Online)
- Network Penetration Testing Training: 40 Hours Training
Pricing: 14,000/- + GST
- Android Penetration Testing Training: 40 Hours Course
Pricing: 14,000/- + GST
- IoT Penetration Testing Training: 40 Hours Course
Pricing: 21,000/- + GST
- Computer Forensic Testing: 40 Hours Course
Pricing: 14,000/- + GST
- Bug Bounty Training: 40 Hours Course
Pricing: 14,000/- + GST
- SOC Analyst Training: 40 Hours Course
Pricing: 22,600/- + GST
- OSCP Training: 40 Hours Course
Pricing: 32,000/- + GST
- Reverse Engineering and Malware Analysis Course: 40 Hours Course
Pricing: 20,000/- + GST

6. Programming:

- Python Programming: 40 Hours Course (Classroom/Online)
Pricing: 9,000/- + GST (Classroom), 11,000/- + GST (Online)
- Django Developer: 40 Hours (Classroom/Online)
Pricing: 8,000/- + GST
- Java Programming: 40 Hours Course (Classroom/Online)
Pricing: 8,000/- + GST
- Android Developer: 40 Hours Course (Classroom/Online)
Pricing: 10,000/- + GST
- DevOps Training: 40 Hours Course (Classroom/Online)
Pricing: 14,000/- + GST
- Secure Web Development Training: 40 Hours Course (Classroom/Online)
Pricing: 17,500/- + GST
- IoT Training: 40 Hours Course (Classroom/Online)
Pricing: 14,000/- + GST

7. Machine Learning:

- Artificial Intelligence Training: 3 Months Duration (Online/Classroom)
Pricing: 15,000/- + GST
- Machine Learning using Python: 3 Months Duration (Online/Classroom)
Pricing: 14,000/- + GST
- Data Science using Python: 3 Months Duration (Online/Classroom)
Pricing: 14,000/- + GST
- Online Machine Learning: 3 Months Duration (Online)
Pricing: 14,000/- + GST
- Embedded Systems and Robotics Training: 3 Months Duration
(Online/Classroom)
Pricing: 13,000/- + GST
- ISO/IEC 27001 Lead Auditor Training: 3 Months Duration (Online/Classroom)
Pricing: 20,000/- + GST

Market Competitors of ICSS in the field of Cyber Security:

1. Quick Heal Technologies

2. BD Software

Distribution Pvt. Ltd.

3. CyberFrat

4. eSec Forte Technologies

5. K7 Computing

1. Quick Heal Technologies:

About the Company:

Quick Heal Technologies Ltd. is one of the leading IT security solutions companies. Each Quick Heal product is designed to simplify IT security management across the length and depth of devices and on multiple platforms. They are customized to suit consumers, small businesses, Government establishments and corporate houses. Over a span of **3 decades** the company's R&D has focused on computer and network security solutions. The current portfolio of cloud-based security and advanced machine learning enabled solutions stop threats, attacks and malicious traffic before it strikes.

Why to choose Quick Heal?

The company strive to solve complex problems with the simplest solutions by keeping in mind the unique needs of our customers. Quick Heal is a smart, easy to use and an extremely fuss-free product for your everyday protection against IT threats and viruses. That makes us one of the most trusted Antivirus brands in home users.

- Best in class customer support.
- Global Presence
- Multi-Platform

Products, Services & Pricing:

1. **Quick Heal Antivirus Pro:** Designed for basic protection against viruses, malware, and phishing attacks.

- 1 PC, 1 Year: ₹569–₹737
- 1 PC, 3 Years: ₹999–₹1,095
- 2 PCs, 1 Year: ₹649–₹699
- 2 PCs, 3 Years: ₹1,199–₹1,499
- 5 PCs, 1 Year: ₹1,549–₹1,899
- 10 PCs, 1 Year: ₹2,439–₹2,999

2. **Quick Heal Internet Security:** Offers enhanced protection for online activities, including banking and browsing

- 1 PC, 1 Year: ₹699–₹915
- 2 PCs, 3 Years: ₹2,028
- 3 PCs, 1 Year: ₹1,717
- 5 PCs, 3 Years: ₹5,087

3. **Quick Heal Total Security:** Comprehensive protection with advanced features for complete digital security.

- 1 PC, 1 Year: ₹945–₹1,162
- 1 PC, 3 Years: ₹2,099–₹2,399
- 2 PCs, 1 Year: ₹1,406–₹1,699
- 3 PCs, 3 Years: ₹5,799
- 5 PCs, 1 Year: ₹3,879–₹3,999
- 5 PCs, 3 Years: ₹5,780–₹7,899

4. **Renewal Packs:** For existing users looking to renew their subscriptions at discounted rates.

- Total Security Gold Pack (1 User, 3 Years): ₹1,849
- Total Security Silver Pack (1 User, 1 Year): ₹929
- Total Security Gold Pack (5 Users, 3 Years): ₹6,585

Services:

Quick Heal Academy: Quick Heal Academy is a premier institute engaged in creating skilled workforce proficient in supporting and securing the cyberspace globally. The academy has collaborated and acquired cooperation from government and corporate bodies. It further aspires to create awareness on the regulatory framework of cyber security.

1. Workshops:

- Cyber Security-Basement to Boardroom (6 Hours Course)
- Open-source Intelligence (OSINT-16Hours Course)
- Blockchain, Darkweb, and Cybercrime (6 Hours Course)
- Windows Forensic (24 Hours Course)
- Cyber Crime Scene Investigation (16 Hours Course)
- Incident Responder (16 Hours Course)
- Social Media Intelligence (8 Hours Course)
- Introduction to Data Privacy (6 Hours Course)
- Cyber Threat Intelligence (24 Hours Course)
- Cyber Security Awareness (6 Hours Course)
- Safeguarding Digital Footprints (6 Hours Course)

2. Short Term Programmes:

- Reverse Engineering and Malware Analysis (80 Hours)
- Cyber Security Professional (80 Hours)
- Cyber Crime Investigation (40 Hours)
- Security Operations Centre (SOC- 32 Hours Course)
- Python-for Extreme Hacking (Offensive Security) Professional (40 Hours)
- Bug Bounty Hunter (40 Hours)
- Network Security Professional (40 Hours)
- Cyber Law-The Indian Perspective (40 Hours)
- Digital Forensic Investigation (40 Hours)

3. Long term Programmes:

- Cyber Security 4-year Undergraduate program at Chitkara University (4 years)
- Cyber Security 4-year B.Tech(Hons.) program at Quantum University (4 years)

4. Industrial Trainings:

- Industrial Trainings on Cyber Security (6 weeks)

5. Online Industrial Trainings:

- Cyber Security Professional Course (70 Hours)

2. BD Software Distributions Pvt. Ltd.

About the Company:

BD Software has etched its name as an eminent distributor of IT security solutions in India. The company takes pride in being the Country Partner for Bitdefender solutions. This solution distributed by BD software is the best guarding solution for Government, large corporate houses, small and medium business enterprises, Educational Institutions and the retail consumers alike.

Distributing software to nullify or defend a possible cyber-attack and safeguard confidential information in the cyber world is a Himalayan task.

BD Software along with its channel partnerships and distribution carry out such solutions to the doorstep of every company, big or small. BD Software distributes solutions from world known companies having some of the best solution available in their fields.

BD Software has established itself as the most sought-after solution provider in the country. The trust gained through its services has cemented the confidence in its clients to entrust BD Software Distribution Pvt. Ltd. with the task of safeguarding their system in this new age of the cyber world.

Company Products:

1. Bitdefender Business Solutions: A single console gives you comprehensive protection for your workstations and servers, physical or virtual. GravityZone Business Security blends machine learning and heuristics with signatures and other techniques to offer protection against all types of malwares.
2. Bitdefender Home Solutions: In the Bitdefender labs, they harness Artificial Intelligence and develop the world's most advanced technologies to offer you the best virus detection rate in the world, without slowing down your devices.
3. Safetica: The product protects companies against insider threats. 80% of companies suffer data loss through employee errors or malicious acts. You can run your company without risking the loss of valuable intellectual property, copyrights or other data.
4. GTB Technologies: GTB offers unparalleled data protection and security by operating seamlessly on-premises, at the endpoint, and in the cloud—ensuring comprehensive coverage wherever your data resides. With advanced detection capabilities, GTB identifies threats that others overlook, delivering next-level safeguarding for your critical information.
5. We360.ai: Helps in employee productivity management.
6. Crossware: The perfect enterprise email signature management solution to create consistent, secure and compliant email signatures across all devices and teams.
7. OctoXLabs: Helps in asset and inventory management.
8. 42Gears: Securely manage and monitor all your business devices from a single dashboard. Deploy apps, enforce policies, and protect corporate data.
9. Scalefusion: Manage all your devices—Windows, macOS, iOS, Android, Linux, ChromeOS – from one single dashboard. No inefficiencies, no silos—just strategic, unified endpoint management at scale.
- 10.FSprotect: Advanced threat actors take advantage of Active Directory deficiencies most of the time. FSProtect, aims to restrict the adversary

maneuverability by detecting vulnerabilities misconfigurations, and hidden attack paths lurking in the complex relationships with minutes.

11. Resecurity: Helps in Digital Risk Management.
12. GoldPhish: Helps in Phishing simulation and Cyber Security Awareness.
13. ePrompto: ePrompto is a cloud-based IT asset management and managed services platform designed to help organizations efficiently manage their IT infrastructure. It offers a centralized console for overseeing devices, optimizing performance, and ensuring security.
14. IPM+: Vigyanlabs is an innovation-driven organization focused on building Intelligent Power Management and Self-Care products to promote green computing and save money for Enterprises. Founded by Srinivas Varadarajan and Srivatsa Krishnaswamy, we have attracted some of India's best talent to create new intellectual property and build technology products to deliver the benefits of our IP and knowledge base to the society at large rapidly.
15. TSplus: TSplus is a globally recognized leader in Application Server solutions, specializing in the virtualization of Windows applications for effortless Internet access. By simplifying complex processes, TSplus ensures smooth deployments, delivering exceptional performance, reliability, and security while maintaining high user satisfaction.
16. Systweak: PDF software solution.
17. Foxit: Powerful desktop PDF solution to create and edit PDF documents and integrate with Foxit eSign.
18. ABBYY: ABBYY is a leading provider of AI-based solutions for document processing, data capture, and intelligent automation. The company specializes in Optical Character Recognition (OCR), text recognition, and intelligent document processing (IDP) solutions that help businesses extract, process, and analyze information from scanned documents, PDFs, and images.

3. CyberFrat:

About the Company:

At CyberFrat, the organizations build cybersecurity through future-ready education, strategic advisory, and creative awareness. The mission is to bridge the gap between technical security and business impact to help them secure profit, creating a culture of cyber confidence across all levels.

Company Products and Services:

1. Education: To empower individuals, corporates, and academic institutions to stay ahead in the ever-evolving world of technology and cybersecurity. The future-focused training programs deliver top-notch quality while remaining cost-effective, helping tech and security professionals upskill on the latest technologies. The company support organizations in building their cyber defense readiness through tailored corporate learning solutions and prepare students for real-world success with industry-aligned curricula and hands-on experience.
2. Advisory: To assist senior management and board members make confident, informed decisions about their cybersecurity roadmap. Through strategic advisory sessions, tailored tabletop exercises, and risk maturity assessments, to align cybersecurity with your business vision, ensuring it supports growth, not hinders it. The approach is aligned with major compliance requirements such as RBI, SEBI, IRDAI, HIPAA, GDPR, NIST, ISO 27001, PCI-DSS, CERT-In guidelines, and more.
3. Awareness: To design cybersecurity awareness that captures attention and drives real change. The approach blends creative storytelling with persona-based communication to drive real behavior change. Through visually striking videos, interactive learning, and relevant content like posters, infographics, and EDMs, to deliver campaigns that resonate with your workforce. Every asset is tailored to your organization's language, industry, and risk profile.

Product and Services Pricing:

1. Gold Membership: (299 Courses in Cyber Security from Industry Experts)

- 1 year @ 9,999/- + GST
- 3 years @ 19,999/- + GST
- 5 years @ 24,999/- + GST
- Lifetime Membership @ 49,999/- + GST

2. Top Selling Courses:

- Threat Intel & Dark Web - 1999/-
- Digital Forensic – 1999/-
- Elevating Organizational Security – 1999/-
- Advancements in quantum computing technologies – 1999/-
- APT Attack Techniques and Defences – 999/-
- Root Cause Analysis – 199/-
- Introduction to ISO27002:2022 – 199/-
- Risk and Information System Control – 2499/-
- Certified Information System Auditor – 4999/-

3. Free Courses:

- Demystifying Cyber Risk
- NIST Cybersecurity Framework
- Code to Cloud
- Workforce: Cyber Intelligence and Security
- Data Discovery and Classification
- Zero Trust Prevention Strategy
- Simplifying Vulnerability Management
- Cyber Threat Intelligence Differentiating Signal from Noise
- Darktrace Cyber AI Platform

4. eSecForte:

About the Company:

eSec Forte® Technologies is a CMMi Level 3 certified Global Consulting and IT Security Services company with offerings across Cloud Security, Cyber Forensics, Malware Detection, Security Audit, Red Team Assessment, Threat Hunting, Security Operations Control, Penetration Testing, Secure Access Management, Risk Assessment, IOT Security etc.

They are **CERT-INDIA** empanelled for providing Information Security Auditing Services. We are **Global PCI DSS QSA** and are authorised by the **PCI Security Standards Council** to validate an entity's adherence to **PCI DSS**.

They are **OEM** for **NXSAM (Next Generation Security Audit and Management)** a platform to track vulnerability life cycle for networks, applications, cloud or Third-Party Vendors.

They are Authorized Technology Partners of Information Security Solutions CATO Networks, Tufin (Firewall Management), Nessus, Tenable SecurityCentre, Core Impact, Atola Technology, Delinea (Privileged Access Management), Netsparker, Burpsuite, AccessData FTK, AD Enterprise, E-Discovery, HCL AppScan (Application Security Testing), Cyber Deception and more.

The company have also developed '**Crackbox**' – an accelerated hardware for password processing and other activities.

The success stories are translated in the form of positive testimonials from our growing list of clients. Headquartered in Delhi, we have our delivery centers in Bangalore, Gurugram and Mumbai in India, Sri Lanka & Singapore.

Products and Services:

1. **Cybersecurity & Compliance Services:** eSec Forte provides a comprehensive suite of cybersecurity services, including:

- **Security Assessments:** Vulnerability management, penetration testing, red teaming, and risk assessments.
- **Managed Security Services:** Continuous threat monitoring, incident response, and threat hunting.
- **Compliance Audits:** Assistance with ISO 27001, PCI DSS, and other regulatory standards.
- **Cloud Security:** Protection for cloud infrastructures and applications.
- **Digital Forensics & Incident Response (DFIR):** Investigation and mitigation of security incidents.
- **Transformation Services:** Support for adopting new security technologies and practices.

2. **Indigenous Forensic Hardware:** Under the 'Make in India' initiative, eSec Forte has developed several forensic hardware products:

- **DRONA Series Workstations:** High-performance forensic workstations available in three configurations:
 - Series I (Basic)
 - Series P (Medium)
 - Series X (High-end)

Features include biometric authorization, persistent memory, integrated webcam, redundant power supply, and advanced cooling systems.

- **DRONA Lab Station:** An advanced forensic system designed for rapid digital investigations with high-performance computing capabilities.
- **DRONA Kiosk:** A portable device for quick scanning and logging of digital evidence, aiding in maintaining the chain of custody.

- **DRONA Incident Response Kit:** A compact kit equipped with essential tools for on-site digital investigations, ensuring swift data preservation.
- **Faraday Bags:** High-quality, durable bags designed to shield electronic devices from RF signals, EMI, EMR, and EMF radiation. Available in three sizes, they are essential for law enforcement and forensic investigators.

3. Proprietary Software Solutions:

- **NxSAM (Next Generation Security Audit and Management):** A centralized audit management solution enhancing the efficiency of vulnerability lifecycle management.
- **CrackBox:** An accelerated hardware tool developed for password processing and other related activities.

4. Technology Partnerships: eSec Forte collaborates with several technology partners to offer comprehensive security solutions, including:

- Cato Networks
- Tufin (Firewall Management)
- Nessus, Tenable Security Center
- Core Impact
- Atola Technology
- Delinea (Privileged Access Management)
- Netsparker, Burp Suite
- AccessData FTK, AD Enterprise
- HCL AppScan (Application Security Testing)
- Palo Alto Networks (Prisma)

5. K7 Computing:

About the Company:

From the days of DOS to the age of AI, K7 has remained the trusted guardian of digital civilization and has protected the world from cyberattacks by adopting, and adapting to, the latest technology while remaining committed to the values that have served us well over 3 decades: delivering the best cyber defense without impacting the performance of digital infrastructure.

K7's journey began in 1991 when the company was founded to protect cyberspace and prevent cyberattacks from destroying digital creations. Kesavardhanan J, the founder of K7, created a scan engine that continues to be the beating heart of K7's cybersecurity solutions and has made K7 a member of the exclusive club of international cybersecurity providers who have developed a proprietary scan engine. The benchmark-setting scan engine was followed by the establishment of K7 Labs to perform malware research and provide the critical threat definitions that accelerate attack detection. Cyber defense requires both technology and talent and K7 Academy was established to create cybersecurity professionals with the skills to counter real-world attacks.

Over the years, K7 has anticipated how digitalization has transformed work and life and developed new solutions to protect mobile lifestyles and the boundaryless enterprise. Hybrid work, multi-cloud infrastructure, generative AI, and stringent regulations have introduced new challenges in securing businesses and K7 has responded by providing cybersecurity services, Extended Detection and Response (EDR), Security Operations Centre (SOC), Security Information and Event Management (SIEM), and the Cherubim iVision managed security platform to meet enterprise requirements.

Products & Services:

1. Home Products:

- K7 Antivirus Premium: Price – INR 599/- to 2939/- (Based on years and devices)
- K7 Total Security: Price - INR 1079/- to 5649/- (Based on years and devices)
- K7 Ultimate Security: Price - INR 1199/- to 7799/- (Based on years and devices)
- K7 Antivirus for Mac: Price - INR 839/- to 4139/- (Based on years and devices)
- K7 Mobile Security: Price – INR 599/-

2. Business Products:

- K7 InfiniShield: AI-enhanced unified XDR platform for single pane of glass cybersecurity
- K7 Cyber Protect 360: Comprehensive endpoint protection with proactive EDR providing centralized control over applications, devices, and networks
- Endpoint Security: Complete endpoint protection with the scalability and manageability larger business's needs, managed from an on-premises machine or through the cloud
- Network Security: Next Generation Firewall, VPN Concentrator, Secure Branch Connectivity, secured SD-WAN, Network User Authentication, and Tally on WAN hardware solutions for gateway security and secure inter-branch communication.

3. Consulting Services:

- K7 Cyber Defence Assessment
- K7 Red Team Assessment
- K7 VAPT
- K7 GRC
- K7 IMS
- K7 ISAP

4. **K7 Academy:** K7 Academy, a unit of K7 Computing, helps colleges develop students into job-ready cybersecurity professionals through the K7 Malware Analysis Training Program that assists educational institutions in establishing a Malware Lab and conducting Malware Research.
- Certified Malware Researcher – Windows (80 Hours/15 days)
 - Certified Malware Researcher – Android (24 Hours/4 Days)
 - Network Security (24 Hours/4 Days)
 - Vulnerability Assessment and Penetration Testing (18 Hours/3 Days)
 - CyberSecurity Sentinel (6 Hours/1 Day)
 - Security Incident Respond (1 Month)

SWAT Analysis of the Companies:

1. Indian Cyber Security Solutions (ICSS):

Strengths:

- Offers a range of cybersecurity services, including penetration testing, vulnerability assessments, and security audits.
- Provides training programs and certifications in cybersecurity, enhancing workforce skills.
- Affordable pricing, making services accessible to small and medium enterprises.

Weakness:

- Limited global presence compared to larger competitors.
- May lack advanced proprietary tools and technologies.

Opportunities:

- Growing demand for cybersecurity services in India presents expansion opportunities.
- Potential to develop proprietary training platforms or tools.

Threats:

- Intense competition from established global cybersecurity firms.
- Rapid technological changes requiring continuous adaptation.

2. Quick Heal Technologies:**Strengths:**

- Well-established brand with a strong presence in the antivirus and endpoint security market.
- Offers a range of products catering to individual users and businesses.
- Competitive pricing with various subscription plans.

Weakness:

- Primarily known for antivirus solutions; may need to diversify into broader cybersecurity services.
- Facing stiff competition from international antivirus providers.

Opportunities:

- Expanding into enterprise-level cybersecurity solutions.
- Leveraging AI and machine learning for advanced threat detection.

Threats:

- Evolving cyber threats requiring constant product updates.
- Price wars and feature competition in the antivirus market.

3. eSec Forte Technologies:**Strengths:**

- Offers a comprehensive suite of cybersecurity services, including digital forensics and incident response.
- Developed indigenous forensic hardware like the DRONA series
- CERT-In empaneled and CMMi Level 3 certified, indicating credibility.

Weakness:

- Pricing details are not publicly disclosed, which may deter potential clients.
- Limited visibility in the consumer market.

Opportunities:

- Growing demand for digital forensics in law enforcement and corporate sectors.
- Potential to export indigenous hardware solutions.

Threats:

- Competition from global cybersecurity service providers.
- Rapid technological advancements requiring continuous innovation.

4. BD Software Distribution:**Strengths:**

- Value-added distributor offering a range of cybersecurity solutions.
- Partners with leading cybersecurity brands to provide comprehensive solutions.
- Offers pre-sales and post-sales support, enhancing customer experience.

Weakness:

- Primarily a distributor; limited development of proprietary products.
- Dependence on partner products may limit flexibility.

Opportunities:

- Expanding distribution network to reach more customers.
- Potential to develop proprietary cybersecurity solutions.

Threats:

- Market saturation with multiple distributors offering similar products.
- Changes in partner strategies affecting product availability.

5. CyberFrat:**Strengths:**

- Focuses on cybersecurity training, awareness, and community building.
- Offers workshops, webinars, and certifications to upskill professionals.
- Strong community engagement fostering knowledge sharing.

Weakness:

- Limited product offerings; primarily focused on training and awareness.
- May lack proprietary cybersecurity tools or platforms.

Opportunities:

- Growing demand for cybersecurity professionals presents training opportunities.
- Potential to develop proprietary training platforms or tools.

Threats:

- Competition from established cybersecurity training providers.
- Rapid changes in cybersecurity requiring continuous curriculum updates.

6. K7 Computing:**Strengths:**

- Offers a range of antivirus and internet security solutions for individuals and businesses.
- Competitive pricing with various subscription options.
- Recognized for lightweight software with low system impact.

Weakness:

- Less brand recognition compared to global antivirus providers.
- Limited diversification into broader cybersecurity services.

Opportunities:

- Expanding into enterprise cybersecurity solutions.
- Leveraging partnerships to enhance product offerings.

Threats:

- Intense competition in the antivirus market.
- Evolving cyber threats necessitating rapid product updates.
